

A schematic diagram of a cable-stayed bridge. The bridge consists of two main vertical cables, labeled 1 and 2, which support a horizontal deck, labeled 4. The deck is shown with a break in the middle, indicated by two wavy lines. At each end of the bridge, there is a triangular pylon structure. The pylon on the left is labeled 1, and the pylon on the right is labeled 2. A cable car, labeled 3, is shown on the deck. The cable car is connected to the cables by two vertical supports, labeled 5 and 6. The cable car is also connected to the cables by two horizontal supports, labeled 7 and 8.
